

# TechWizard™

## TechWizard™ Requirements

TechWizard™ requires ~100 MB of disk space.

Microsoft® Windows®

Full installation of Microsoft® Excel® 2010 or higher. This includes Office® 365.

The Excel® Solver Add-in should be installed too. If you are not sure what this means, do an Internet search for “Excel install solver add-in”.

For a network installation we suggest putting TechWizard™ on a shared drive. The drive letter must be the same for all users.

Most network scenarios that can run Excel® and Excel's VBA applications will meet TechWizard™ requirements.

Note: Visual Basic for Applications (VBA) is part of Excel®.

If you have Office 365, you will need to download and install the Microsoft Office applications. For more information, do an Internet search for, “download applications from Office 365”.

## Notice

TechWizard™ will not run in Excel® online.

TechWizard™ will not run in Microsoft® Excel® for Mac.
