

Production Wizard™

Production Wizard™ Site* Standard License

Production Wizard™ is supplied to users through a site* license. A Production Wizard™ site* license is required for each facility using the application. This is the case due to the required configurations and integrations associated with each facility. For example, if a company has two manufacturing facilities and both facilities wish to use Production Wizard™ then both facilities must purchase a site license. This is required regardless of the computer network on which the application is installed. Additional seats are available for purchase if more users need access to Production Wizard™.

Production Wizard™ Site* Enterprise License

The enterprise license has all the same requirements as the standard site* license. It is designed to provide access to multiple configurations and integrations associated with a facility using one instance of the Production Wizard™ application.

Users Accessing Multiple Sites*

As long as a user has a licensed seat, they may access any Production Wizard™ site* license.

Services Provided with the Purchase of a Site* License

The following services are provided with the purchase of a site* license:

- Custom Batch Report
- Other Integrations
- Training
- Setup Assistance

These services are provided based on the needs of the client and implementation is negotiated prior to license purchase.

*Site uses the ISA-S88 definition. A geographical location.
